Press Release Novel Coronavirus Update

On 6/30/2020, the Teton County Health Department received notice from Montana Department of Public Health & Human Services (DPHHS) that 3 individuals residing in Teton County have tested positive for novel Coronavirus (COVID-19). The individuals include a one adult and two children, all from the same household. The source of infection is related to close contact with a confirmed COVID-19 case from a different county. The individuals are all experiencing mild symptoms and are isolating at home.

The Teton County Health Department is currently notifying close contacts of these individuals, and will continue to investigate and inform anyone else who may have been exposed. If you have not been contacted by the Teton County Health Department, you should still avoid large gatherings, practice social distancing, wear a mask to reduce transmission of disease, and wash your hands often.

The Teton County Health Department has been preparing for the first detected case of the disease, working with partners including health care providers, first responders, educators, and elected officials to prepare to respond to confirmed cases.
