Press Release Novel Coronavirus Update

Teton County Public Health was notified by Montana Department of Public Health & Human Services (DPHHS) that two additional Teton County residents have tested positive for novel Coronavirus (COVID-19) today. Teton County now has a total of 5 confirmed cases. The new cases, as well as the ones identified yesterday, are part of a cluster stemming from a large gathering in June.

The cases and contacts have been given an order to isolate and quarantine: however, there is potential for community spread. We recommend high risk populations stay home. Teton County Public Health is asking all residents to please exercise precautions to protect yourself, your family, and your community. Keep 6 feet of distance from others, wear cloth face coverings, wash hands, sanitize surfaces, and please avoid gathering with non-household members.
